

## Process Engineers

### **Accountabilities:**

- Focus on longer-term chronic problems and/or improvement objectives which enable the operating managers to focus on meeting their short term product, process and cost objectives.
- Support the operating group in achieving their annual product and process improvement objectives as outlined in their continuous improvement program.
- Raise the awareness and drive the organization to apply disciplined statistical process control (SPC) systems and techniques.
- Identify process, product and technology improvements resulting in Essar being recognized as a leader in the industry.

### **Qualifications:**

- Must have a 4 year Technical degree (preferably Engineering) OR, 3 year Technical degree and relevant experience in an analytical position.
- Possess keen analytical and problem solving skills.
- Advanced computer skills are important.
- Good organizational and communicative skills.
- Strong project management and technical leadership skills.
- Good people and team skills.
- Good detailed knowledge of steel production or processes.
